## Professional Summary

---

Full-Stack developer with experience developing and deploying Java-based Web Applications. Experienced in the Agile methodology, strong team-player and knowledgeable in the industry's best practices. Looking to join a strong Web Development team as a front or back end developer.

## Skills

---

**Programming Languages:** Java, C#, JavaScript

**Web Services:** HTML, CSS, AWS

**Frameworks/Libraries:** Spring, jQuery, Bootstrap4, Hibernate/JPA, React

**Others:** SQL, Git, Agile Development

## Projects + Links

---

### Story Agora

- Developed a full-stack Java application leveraging the Spring Framework, using features like Spring Security for secure HTTP request sending and JPA/Hibernate for database abstraction.
- The website is a hub for sharing short stories with other users online.

*Java, Spring, MySQL, Bootstrap4, jQuery, HTML, CSS*

---

### Personal Website

- Created an elegantly designed portfolio website and used react-router for an improved single-page navigation experience. Took full advantage of libraries like framer-motion to further enhance the User Experience.

*React, HTML, CSS, JavaScript*

---

### Oh-My-Gacha – Web tool

- Developed a simple web tool that uses logarithmics to provide an estimate to users about how much money could possibly be wasted on a video game featuring micro-transactions. Used the Spring framework for server-side calculations and HTTP request handling combined with client-side data entry validation.

*Java, Spring, Bootstrap4, HTML, CSS, jQuery*

---

### Shattered – Video Game

- Was the Lead Developer and Project Manager on a final year University project. Created a 3D first-person puzzle game in the Unity3D engine and approached the project using Agile Methodology.

*Unity3D, C#, Blender*

---

## Education

---

Plymouth University – BSc (Hons) Computer Science **(2:1)**

Addey & Stanhope Sixth Form – 3 A-Levels **(A-C)**

Platanos College - 9 GCSEs **(A\*-C)**
